Empty seats, a new alternative.

Empty seats ( *escaños en blanco* ) is a political party that provides representation for those citizens who cannot find a satisfactory choice among the present political parties.

Its electoral program has a single point: not to take possession of office, leaving empty all the seats that could ever achieved, and also relinquishing any form of remuneration.

This political party seeks to pressure the other political parties to represent citizens in a much more ethical and respectful way. Blank seats will be dissolved after the electoral law be reformed to take into account the blank vote on empty seats as computable.
